

Datasheet

Part No.:	501113
Description	Laboratory bottle DURAN - GL45, 1000 ml, clear glass & round + cap and spout
Measurements (WxDxH):	101 x 230 x 101 mm
Volume:	1 l
Weight:	0,558 kg
Colour	Glasklar
Material:	Borosilicate Glass 3.3 PP screw cap
Sealing material:	PP
Chemical resistance:	excellent
Operating temperature:	max. 140 °C
Closure type:	GL45 screw cap
Thread size:	GL45
Diameter:	101,0 mm

Compliance / approvals

Document No.:	Date	Inspection authority:
----------------------	-------------	------------------------------

UN approval:

Other approvals / marks:

- Reg. Trademark: DURAN®
- USP Standard
- ISO 4796-1
- autoclavable/ sterilizable

Safety instructions:

DURAN® laboratory bottles are, with the exception of the pressure-resistant DURAN® pressure plus bottles, in general not suitable for use under pressure or in a vacuum.

When autoclaving sterilising, the screw cap should only be loosely applied, since with a closed bottle pressure equalisation does not take place. Pressure in the bottle may result in breakage.

The maximum thermal shock resistance is $\Delta T=100$ K.
