

**The Future
of safe Level
Monitoring.**

Safe Level Monitoring

Automatic re-filling and draining

SCAT Connect measures your liquid levels of solvent supply and waste containers with millimeter precision. The hydrostatic measuring method provides exact results for liquid chemicals. External devices such as pumps can be controlled.

Space-saving & retrofit

- Only 6 mm tubing diameter
- Easily adaptable to all SCAT Safety Solutions

Suitable for explosion-proof areas

- No electrical components placed within the safety zone
- Perfect for use inside of safety cabinets and explosion-protected areas

Variable tubing lengths

- Monitoring device can be placed in appropriate distance to the safety zone
- Extendible up to 3 m

Wireless communication

- Simple setup without cables
- Central monitoring of multiple systems
- WLAN connection

Well-proven control unit

- Original SIEMENS components
- Durable & reliable

Chemically resistant

- Measuring hose made of PTFE
- Suitable for organic solvents, acids & alkalis

Precise, continuous measuring

- Reliable measuring method (hydrostatic)
- Suitable for all liquid chemicals
- Calibratable for specific chemicals

Everything under Control:

precise, calibrated, connected.

SCAT Connect integrates easily and smoothly into your work flow. Benefit from real-time and exact control of your liquid levels - for maximum process safety!

✓ Pump control & device interface

In order to respond automatically to fill level changes, the standardised interface can trigger pumps or other external devices to refill or discharge your containers.

✓ Connectivity & central monitoring

Use only one interface to control multiple systems from one central location.

✓ No additional software needed

SCAT Connect works with every contemporary web browser, and also on your mobile devices.

✓ Individual level settings

Receive notifications for any preferred filling level: prevent your solvent supply from running low, and your liquid waste from overflowing.

✓ Precise & individual calibration

Adjust the system calibration to the characteristics of your chemicals to get 100% accurate results within millimeter range!

✓ Audio-visual alarm

Critical liquid levels will be indicated graphically and acoustically. The acoustic alarm can be muted. Use the advanced settings to adjust the sound to your individual preferences.

Safe network

- Wireless connection to your computer or WLAN

Intuitive user interface

- Adjustable easily & individually
- Works with every contemporary web browser
- Access to all settings & preferences
